1. The following is an examiner's statement of reasons for allowance: Applicants show a shaving composition having an astringent effect comprised of butylene glycol and mushroom extract. The ingredients are used in topical preparations in the art. The JPA reference JP 11-322534-A, considered the closest prior art of record, shows a ceramide synthesis promoter wherein a mushroom microbial cell is cultured with 1,3-butylene glycol. The prior art does not show nor fairly suggest applicants' particular combination of an extract of mushroom combined with butylene glycol such that the composition comprises a skin-tightening effective amount of an astringent utilized in a shaving composition.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claims 1, 3-6, 8-11 and 13-15 are allowed.
